## Faculty Practice and AEGD get an Extreme Makeover

---

*Before*

*After*

It may not be on par with the ABC TV reality show “Extreme Makeover,” but the renovation of the UMKC School of Dentistry’s clinical facilities for Advanced Education in General Dentistry and Dental Faculty Practice were remodeled from the ground up during the summer of 2008. The project completely redesigned and refurbished the patient care areas, classrooms, laboratories, and offices. The new configuration will also house more semi-private treatment and teaching areas, new treatment chairs and delivery units with electric hand pieces, workstations for patient record access, digital radiography, and six microscopes.

The \$2-million project was funded under a special allocation from the State of Missouri and supplemented by the UMKC School of Dentistry. Last remodeled over 20 years ago, the new facility reopened for business in late August. ▀
